

SYED ASAD JAMEEL

Software Engineer | IT Expert

+92 308 4401410 syedasad2080@gmail.com @Asad-Zaidi @syedasadjameel Lahore, Pakistan

ABOUT ME:

Software Engineering graduate with hands-on experience in building AI-powered web applications. Great foundation in development. Practical experience in computer hardware/software installation, system troubleshooting, maintenance, and basic networking. Motivated to grow as an IT professional and develop expertise in enterprise systems and infrastructure.

EDUCATION:

- **BS Software Engineering (2022-2025)**

- **COMSATS University Islamabad, Lahore Campus.**

Graduated from Pakistan's top university, Equipped with strong technical foundations and hands-on project experience in modern software technologies.

- **ICS (2019-2021)**

- **Superior College Raiwind.**

Focused on Computer fundamentals, programming concepts, and problem-solving skills.

PROJECTS:

- **Comfort Seats PK - MERN Stack Web Application:**

Designed and developed a scalable MERN-based e-commerce platform comfortseatspk.com with React, Node.js, Express, and MongoDB. Implemented JWT authentication, REST APIs, product and order management, dynamic content management system (CMS), Cloudinary media handling, email notifications, responsive UI, and search engine optimization (SEO).

- **Facial Derma AI - Skin Disease Detection System:**

FacialDerma AI is a comprehensive skin disease diagnosis platform developed using React, React Native and Python. The system uses machine learning models to analyze facial images and predict its conditions. It provides treatment suggestions, and allows users to get review from experts and find nearby dermatologists. The platform includes user authentication, PDF report generation, Dermatologist Verification and Admin Panel to manage the system.

- **Hand Gesture Recognition:**

This project demonstrates real-time Hand Gestures Recognition for ASL (American Sign Language). It captures video from a webcam, detects hands, counts the number of fingers and Hand Gestures for ASL, and displays the results on the screen. The user can also upload the image for prediction.
